

## Keep Track

MimiQ Track protects, tracks, and helps you locate things you care most about. Even when away or out of Bluetooth or cell coverage.

Card-sized GPS Tracker, No-sim,  
Global Network\*,  
Protect Wallet, Gear, Vehicles

Drop a MimiQ Track into your backpack, attach it to your bike, or professional gear, or place it in your cycle, motorbike, car, jet skis, scooters, or truck! Whether heading to the mall, across the world, or just parked at home get notified instantly anytime your property is moved or relocated. Even use MimiQ Track for critical packages – product samples, legal documents, or high-value e-commerce shipments on their way to the destination.

\*subject to where coverage is available based on Helium Network, other partnered LoRaWAN networks and local LoRaWAN frequencies.

## Track your gear – even when away.

Whether at a cafe, gym, or when traveling just place MimiQ Track inside your bag or gear. MimiQ Track will send an instant notification to MimiQ App if your gear is shifted or moved. And even help you track it as it moves across your neighborhood, city, or the nation – outside Bluetooth range.

## Stay connected even when away!

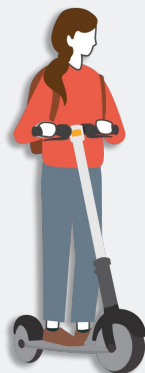

MimiQ Track stays connected to you even when you are away, out of Bluetooth range,

With our MimiQ Fi technology we figure out the best way to keep you connected – Bluetooth, Helium Network or other LoRaWAN networks (subject to coverage).

With Helium and LoRaWAN coverage growing every day you are most likely to find you are always within reach of our partnered network.

## Track your ride

With MimiQ Track guarding your vehicles – bicycles, motorbikes, or cars – you can rest easy knowing that you will be alerted should there be any unauthorized movement or theft. And you can even track your vehicle on the MimiQ App. Not just that – if you are worried about your teenagers' driving habits – use MimiQ Track!

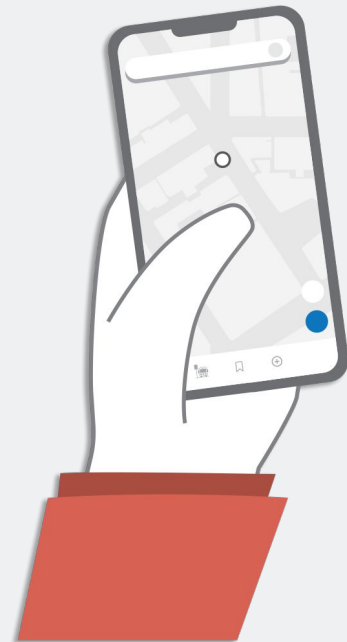

## Track shipments big & small.

Shipping that antique cross country? Or sending pre-release product samples to a key customer? Slip a MimiQ Track into your package as an extra measure so you can keep track of packages.

## It's easier with MimiQ App.

Use the included MimiQ App to easily configure your MimiQ Track for most common scenarios. Just three taps of the MimiQ App and MimiQ Track communicates with your phone or smartwatch via the MimiQ App and display its current location. Customize your experience by setting the alarm and adjusting tracking duration.

## Easier to find than ever.

Worried about pets that may wander the neighborhood or property. MimiQ Track helps you keep tabs without the use of bulky devices or depend on sim cards to stay in touch. At MimiQ we are constantly working on new ways to make it not just safer for you but your pets as well.

## Track without being tracked!

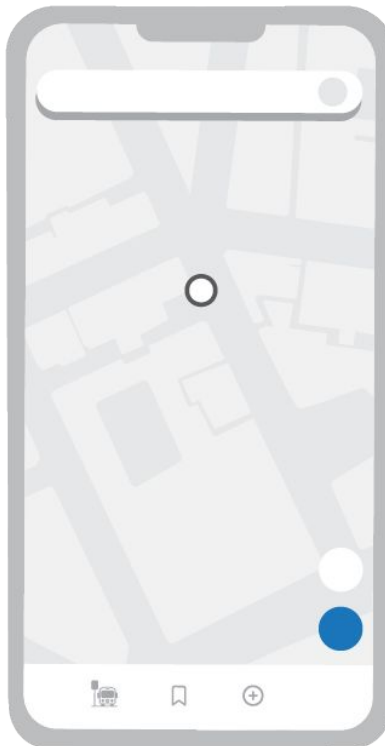

Mimiq Track does not use cameras or microphones to do its things. In fact, the internal GPS in Mimiq Track remains turned off and powers up only when it is moved in an unauthorized manner. And you stay in control of what is shared – even with us.

## Get Set up in 3 Easy Steps!

1. Unbox Mimiq Track. Attach to or place in your valuable items.

2. Use app to select the update period and any optional modes you want.

3. Start tracking and take a sigh of relief

## Portability meets technology
